## PROFESSIONAL SUMMARY

Satyam Anand is a life enthusiast who loves new failures or challenges to come into his life. Bringing a smile gets him thrilled. Majorly excited about technology. Striving to build something that would benefit the mankind. He is a proactive self-starter, with minimal self-guidance or management, good ability to grasp open-source technologies quickly.

## CORE QUALIFICATIONS

- Python
- NodeJS
- JavaScript
- NestJS
- Linux
- DSA
- AWS Lambda
- AWS Code Pipeline
- AWS SNS
- Git
- MongoDB
- SQL
- Java
- GRPC
- Container
- Docker
- Kubernetes

# Satyam Anand

## EXPERIENCE

**Software Development Engineer 2** Bolt.Earth - Bangalore, India  
04/2023 - Present

- Designed, developed, and deployed a robust notification system, ensuring seamless communication through gRPC.
- Improved OLAP design and implemented it for statistical data.

**Backend Developer** Bolt.earth - Bangalore  
04/2022 - 03/2023

- Developed and implemented a comprehensive user action tracking system, achieving 100% coverage using Kafka.
- Engineered and delivered a highly efficient referral system using Nest.js, resulting in a 100% success rate.
- Enhanced the efficiency of map marker clustering in both iOS and Android applications, optimizing performance.
- Created a dynamic routing system utilizing the Google Maps API for optimal navigation between chargers.

**Software Engineer** Soroco India - Bangalore, India  
07/2021 - 03/2022

- Performed panel zooming for dashboard using Django and Angular.

**Python Developer Intern** i8labs - Gurgaon, India  
03/2021 - 07/2021

Designed and developed 100% of backend for KYC verification system which targets Banking systems and telecom operators, using:

- AWS Lambda
- AWS QLDB
- AWS RDBMS (MySQL)
- AWS API Gateway

**Python Developer** Qblocks - Bangalore, India  
11/2020 - 02/2021

- R&D on container isolation, resource allocation and security groups.
- Migrated 20% of Flask API to Django API.

**Python Developer Intern** i8labs - Gurgaon  
08/2020 - 11/2020

- Developed 100% of internal error notification system.

Technologies used are: -

- AWS Lambda,
- RDBMS (MySQL)
- AWS API Gateway

**Front-End Developer Intern** FIMO TECHNOLOGIES & SERVICES PVT.LTD - Hyderabad  
12/2019 - 05/2020

- Developed user dashboard using Angular 8
- Developed API's using Rest API in flask Skills

## EDUCATION

**Bachelor's degree: Information of Science and Engineering**  
**Dayananda Sagar College of Engineering** - Bangalore, 08/2017 - 08/2021  
GPA: 8.2 CGPA

**Certificate of Higher Secondary Education: Computer Science**  
**Chinmaya Vidyalaya (CBSE)** - Bokaro Steel City, JH, 01/2014 - 01/2017  
Percentage: 71%

## ACCOMPLISHMENTS

- Designed and created software and systems for attending online zoom classes automatically just in 1 day.
- Designed and implemented college rank decision making while shortlisting the colleges with best opening and closing rank in each department.
